

Padma Bridge Paragraph for HSC (Class-12) - 300 Words

Padma Bridge, which was built with support from the people and government of Bangladesh, is an important part of modern transportation systems. It was opened by the Honorable Prime Minister Sheikh Hasina of the Government of the People's Republic of Bangladesh on June 25, 2022. This project is a bridge over the fast-moving Padma River in Bangladesh that can be used for many things. The biggest project in the country was built entirely by Prime Minister Sheikh Hasina and with money from within the country, not from outside sources. In 2007, it was thought that the Padma Bridge would cost 10,161 crore 75 lakh taka. It did cost about 30 thousand crores, though, because of changes to the plan, problems with managing the river, and other technical issues. Lauhjung of Munshiganj is on its eastern shore, and Shariatpur and Madaripur are on its western shore. There are 6,150 meters of length and 18,18 meters of width on this bridge. On December 7, 2014, only concrete and steel were used to start building this bridge. China Major Bridge Engineering Construction Company Limited built it. Twenty thousand people, including two thousand outsiders, are directly working on the different parts of the project. Since this bridge opened, 19 districts in the southwest have direct access to the eastern part of the country, including Dhaka. Most of these districts will also have access to the train section when it opens. The economic growth of Bangladesh and the impact of the Padma Bridge on the living standards of billions of people are huge. Also, this bridge will be an important part of the economy and one of the world's most interesting and historic sites. With the completion of the Padma Bridge, Bangladesh has moved into a new age. Padma Bridge will most importantly be a shining sign of the people of Bangladesh's hope, faith, loyalty, and trust.
