

## **Early Marriage Paragraph in 100 Words**

Child marriage happens when a person under 18 gets married. This still takes place in many poor countries though most allow marriage only after 18. Reasons include culture, religion, and money issues. When families can't afford to feed daughters or pay school fees, they may marry them off young instead. This causes the girl to stop her education. It also means young girls have babies before their bodies are fully grown, which is dangerous. Child marriage robs girls of their childhood and future chances. To stop it, we need to change attitudes, help with costs so girls can stay in school, and enforce the minimum age rule. With effort we can end child marriage so girls enjoy safety, education, and more possibilities.
